

NERTRANS **CARGO**

Just closer

Why Nertrans Cargo?

Because we are different from our competitors by:

Finding personalized and effective solutions according to the needs of every client

The seriousness and promptness in responding to various requests

Creating a new category of clients who could benefit of dedicated services

The expertise of the recent years, that have led to a significant increase of our market activity

Implementing a new quality management system in order to guide our company in the activity we perform

Our business card: our experience, the will to innovate and the desire of permanent innovation in what we do

Achievements:

In time we have created our own network of carriers that open our way to the most sensitive destinations

We are defined by the deliveries to/from the former soviet countries, the countries such as: Serbia, Bosnia Herzegovina, Macedonia; but also by the transports towards various destinations in Europe

We have delivered over 16000 Tones of metal for ArcelorMittal and over 3500 Tones of metal for ArcelorMittal Tubular Products; but also 90% of the special shipments of ArcelorMittal Galați

The railway has become our way of achieving the impossible: the railway project for the oversized wagons dispatched to France; 60 wagons dispatched to Krivoy Rog, UA; 15 wagons dispatched to Kazakhstan

We have created a new multimodal relation (barge - truck) through the Ismail Port, UA for the ArcelorMittal Galați deliveries

We have used the customs transit regime for grain transportation, bulk or containerized, on the route GIFP - Constanța Port for redispaching towards the Middle East and Asia (over 200 TEU)

We have realised neutralization/redispaching operations on the route Turkey/Greece/Bulgaria - Russian Federation/Belarus/ Ukraine or/and in reverse direction, through our warehouses in Brăila/Galați Free Zones

We are on TOP 100 of the best Romanian shipping houses - according to the specialized magazine "Tranzit".

Future projects:

Developing a new terminal project for loading/unloading the bulk goods from CSI waggon and trucks in containers on our platform in Galați Free Zone
